**Subject:** Microsoft Anti-Trust Proposed Settlement

As a citizen, voter, and worker in the software industry I wanted to share my opinion of the settlement between the U.S. Federal Government and States and the Microsoft corporation: I AM STRONGLY AGAINST IT!

This deal does little to address the monopoly powers of Microsoft, and their illegal use of those powers to control the technology industry. This deal does nothing to compensate the victims of Microsoft's monopolistic business practices.

The future of the technology industry appears very bleak if Microsoft is allowed to maintain and strengthen its monopolies.

No U.S. company should be allowed to exist above the laws of this country. Please don't accept this settlement which essentially is a surrender by the government and the rule of law to the rule of power (both financial and political) of Microsoft.

Thank you,  
Peter Glassey
